

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically-engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

☒ All GE foods should be labeled so I am informed and have a choice.

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing

☒ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

(Additional Personal Comments:) Although I'm taking a step to
send this card to you, I know of many others who feel as
strongly about this issue as me, but they may not have access to this type
of opinion post card
